UNM Orthopaedic Sports Medicine Conference Schedule

- **Wednesday Morning Sports Fellowship Conference (2-ACC at 6:45AM)**

  1st Wednesday of the month: **Indications Conference** – The fellows should be prepared to present 2-3 cases each that were operated on in the previous month. Cases can be “classic examples”, “out of the ordinary”, “controversial topics”, or “unexpected findings”. The presenting fellow should give a quick case history and show the pertinent images and arthroscopic photos. Then summarize one or 2 papers from the recent literature on the topic and generate some discussion. The fellows should maintain a log of the cases presented (name, MR#, diagnosis, treatment) which will be given to Darren each month.

  2nd Wednesday of the month: **MRI-Correlations Conference** – Combined with Musculoskeletal (MSK) Radiology faculty and fellows. The fellows will collect cases with interesting imaging or findings. MSK faculty will review MRI findings, followed by how they correlate with what was/was not seen arthroscopically. CASES MUST BE SENT TO THE MSK FACULTY AND FELLOWS BY THE FRIDAY BEFORE CONFERENCE. (Jennifer Weaver, Jamie Elifritz, Gary Mlady, Steve Tandberg, fellows)

  3rd Wednesday: **Sports Division Research Meeting**. Faculty, fellows, and interested residents/medical student will review and update progress on the Division’s research projects and also discuss potential new research ideas.

  4th Wednesday: **Primary Care Topic and Article Discussion**. The fellow will be responsible for reading and discussing a chapter from OKU Sports Medicine. The topic will be assigned in advance. The faculty will provide additional information and updates on the topic discussed.

  5th Wednesday: **Non-op Indications Conference**. Similar to Indications Conference, but fellows will present sports medicine conditions treated non-operatively (stress fractures, hamstring strains, etc)

- **Journal Club** will take place at each faculty member’s house on a rotating basis (typically the 3rd Wed evening of each month). Each fellow (orthopaedic and primary care) should select 1 article from a current sports medicine journal (AJSM, JBJS, Arthroscopy, etc.). The article should be downloaded and the PDF emailed to the Program Director by Friday of the week before the Journal Club. The fellowship director will then distribute the articles to all of the attendees. Each fellow will present and discuss the article that they have selected.

- **Sports Medicine Didactics and Pre-op Conference** (Friday 0700-0800 at OSIS). Ten week rotating didactic series and review of the upcoming week’s surgical cases (fellows encouraged to attend).
